

# speexx basic

## Completely self-paced study

Speexx sets the standard for excellence and innovation in online language training. With more than 7 million language students, Speexx is the clear favorite for organizations seeking to improve the business communication skills of their global workforce. Speexx Basic is the perfect self-paced language training solution for students who need to brush up on their existing skills. The award-winning learning solution is clearly structured, helping students to follow their personalized learning path.

Europe's best-selling and award-winning interactive learning solution guides the students through their course plans and individual learning paths.

Effective accent reduction, grammar and vocabulary training all in one tool includes the industry leading IntelliSpeech accent reduction tool.

Keep your students motivated! Mobile vocabulary training and online productivity tools provide effective language training – anytime, anywhere.

### Your benefits with Speexx Basic

- Flexibility and mobility with a completely self-paced training system, based on a globally accepted assessment and quality assurance system.
- Accelerated time-to-value with easy setup, quick integration in learning and performance management systems and fast user adaption.
- Focus on business communication skills in a foreign language.
- The Speexx online testing suite empowers your organization to perform a language skill gap analysis within just a couple of days – or even hours.
- Easy-to-use and engaging online learning resource, ideally suited for self-study with more than 30,000 exercises, 4,000 hours of overall study time and 40 types of fun activities.
- 24/7 tech and integration support.

### Language training innovation

- Europe's leading online language training service.
- Fully personalized learning paths.
- 1,000+ hours' accent reduction with "the best speech recognition tool available" (Chip magazine).
- Real-life tutor with high-resolution videos.
- Intelligent Error Parsing System, providing trainer-like feedback on individual mistakes.
- Voice Pilot interface control to navigate the program.
- Smart Pitch Control for audio output speed.
- Fully recorded bilingual dictionary.
- Print-Your-Own-Textbook feature plus audio export.
- Completely new screen design.
- Easy-to-use reporting and administration tools.

### Engaging online productivity tools

- Easy access to additional services and productivity tools via the new student's portal.
- Mobile vocabulary training for iPhone, iPad and Android smartphones.
- Engaging video activities based on exclusive *New York Times* footage. New videos every month!
- Karaoke pronunciation training: Accent reduction with original celebrity audio footage. Study a language with the likes of Barack Obama, Mark Zuckerberg or Mark Twain.
- Weekly online magazine for extra reading practice.

"A truly impressive example of how technology can be harnessed to improve the learning experience by putting the learner in control of learning a language."
